

Name _____

What Style is Your Home?

Now that you know the year in which your house was built and have observed and thought about some of its features, go to:

House Styles and Home Architecture

http://architecture.about.com/library/bl-styles_index.htm

1. Click on each of the house styles.
2. Read the list of features for each style.
3. Look carefully at the photo of a typical house in that style.
4. Compare the photo of your home to the sample.
5. Write in the table below the style or styles that are most similar to yours and list the features that are common to both homes.

Tip: Be sure to click on any features that are underlined to see an illustration and definition.

Style name	Features that match my home

Now decide which **ONE** style best fits your home and put an **X** next to its name. Be prepared to tell the class your reasons for selecting that particular style.
